

CALL FOR PAPERS

The Transformative Impacts of IS on Work in Globalized Environment

The 2016 conference of French Association Information & Management (AIM) will discuss how Information Systems are fundamentally transforming work in a global environment. Special attention will be put on how IS are influencing the place where work can be done, on the changing nature and structure of work (e.g., what work is done, how work is organized and coordinated) and on who is doing the work. Topics of interest include:

- IS and the changing nature of work
 - IS and changes in the structuring of work
 - IS temporalities and the global workforce
 - IS Impacts in global settings
 - IS and the different sourcing models (offshoring, outsourcing, insourcing, "un"-sourcing, etc.)
 - Peer-to-peer production systems
- ... and all other research in the field of Information Systems.

ORGANIZING COMMITTEE CO-CHAIRS

Aurélie Leclercq-Vandelannoitte (CNRS, LEM UMR 9221)

Caroline Sargis Roussel (IÉSEG School of Management)

François Deltour (Ecole des Mines de Nantes)
